Dear: Editor Journal of Positive Psychology and Wellbeing

I am Teti Ratnawulan, lecturer at Universitas Islam Nusantara, Indonesia

We have an interest in the field of science published by JPPW, and now I have research that is in line with the "focus and scope" of Journal of Positive Psychology and Wellbeing.

We have completed a scientific article entitled "Positive Parenting of Early Years Down Syndrome Children through Guidance Program and Client Centered Counseling Model".

We hope this article can be published in the JPPW, because there are interesting findings in the scientific article that can become new treasures in science.

Best Regards,
Thanks

Tuti Ratnawulan

Dear

Teti Ratnawulan
Universitas Islam Nusantara, Indonesia

The Journal of Positive Psychology and Wellbeing Editorial Board has reviewed your article, the research topic is very interesting, but we decided that your article could not be accepted immediately. You must improve your article on several points.

I am sure you are willing to make this improvement because your scientific articles must meet Journal of Positive Psychology and Wellbeing standards.

Please correct your article according to the instructions from the Journal of Positive Psychology and Wellbeing reviewers.

FIRST REVIEWER

1. This article is very up-to-date and interesting, but in my opinion the novelty is not visible in the introduction, because the references you have quoted are still minimal and have not been compared with your research, so the novelty is not visible
2. Literature review needs to be strengthened with current references to discuss the problem you are researching
3. The research method must be described in detail so that each process is carried out
4. Results and discussion need to be compared with previous findings so that the novelty of the researcher's findings is clearer
5. References need to be reproduced with the latest journals that are relevant to the theme of your research

SECOND REVIEWER

1. The author must indicate why this research is important or urgent to do, for example in relation to the literature vacancies include previous research (if any)
2. Your abstract is too long and wordy, the abstract must be concise and interesting that shows the problem, purpose, method and the novelty of the research results.
3. The research method you use must be more detailed so that it is easy to understand
4. The discussion is not in depth, so I have not seen new findings from this study with the existing literature
5. References need to be added to the latest relevant journal articles for at least the last 5 years.

I hope you can make improvements as soon as possible, and send the revised article again via this email.

Best Regards,

Kepada: Teti Ratnawulan <teti.ratnaw@gmail.com>

Dear

Teti Ratnawulan
Universitas Islam Nusantara, Indonesia

Based on Reviewers' considerations, the article has, at some point, increased. However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

FIRST REVIEWER

1. Abstracts must be made concisely, consisting of all important things related to the topic being written, not repeating the conclusions of the research that has been done.
2. The discussion section must be deepened, the author must link the topics discussed with previous references. In this section the discussion is still weak because the references cited do not support it.
3. Conclusions have not focused on the research objectives. Briefly explain your conclusions to answer the research objectives so as to explain the novelty of this research

SECOND REVIEWER

1. The conclusions you have made are too verbose and do not represent the overall result.
2. We recommend using references from reputable journals, so that they have color in the discussion
3. The author must explain what are the limitations of this research.

Articles that have been revised and please send it back via this email.

Best Regards,

10 Juni 2021 09.50

Dear
Editor Journal of Positive Psychology and Wellbeing

Thank you for your feedback, I will be happy to revise the article according to these instructions.

I will give a little opinion regarding the results of the review

1. The abstract in the article has explained the purpose of the research and the novelty of the research so that I think that the abstract is not long-winded
2. Regarding references from reputable journals, I will use them as a benchmark in dissecting the problem
3. thank you for this good comment from 2 reviewers
